## **Project Title: Keith Haring Website**

I'd like to build this site as multiple pages, rather than a long, single page website. I am planning on having a menu/site navigation probably on the top because of the amount of content and photography, and art images to highlight on individual pages.

- Early Life
  - Education
  - Early works
- Rise to fame
  - Breakthroughs
  - Exhibitions
  - Social Activism
- Pop up shop and later collaborations (and many images)
- Legacy
  - Final years/death
  - Posthumous aspects
  - Social Activism
- Sources

I plan to gather sources from both Wikipedia as well as his foundation for both the imagery and content. I might add more pages or consolidate some depending on where my research goes.
